me:

There once were thousands of aliens on Earth

Fact Check:

The claim that there once were thousands of aliens on Earth is false. There is no verifiable evidence to support the existence of extraterrestrial beings on Earth, and all official statements from the Pentagon and other government bodies confirm that no such evidence has been found[1][3][2].

me:

Ants are 10x stronger than humans

Fact Check:

The claim that ants are 10x stronger than humans is incorrect. Ants are actually about 5,000 times stronger than humans relative to their size, allowing them to carry objects many times heavier than themselves[1][2].
